

9 tips in short

I offer here 9 tips for writing e-books.

The 9 tips are:

1. Check out other e-books
2. Find a topic
3. Set an outcome
4. Write it
5. Give it a professional look
6. Make it official
7. Publish it
8. Price it
9. Distribute it
10. Give better client value

I know thousands of people who have begun books, and only a few who have completed them. Remember writing a book, e- or not, is a time-consuming task.

Make time for writing and editing. Don't expect to write a book in an afternoon (not a good one, anyway!) and let yourself off the hook if it takes a while!

Someone French (Victor Hugo?) said "I hate writing. I enjoy having written". That sums it up for my experience!
